My business forces me to travel regularly by vehicle, thus warranting my purchase of satellite radio. Being able to tune in to traffic and weather for a city I intend to travel in has benefited me greatly. Especially when it comes to navigating around these cities due to road construction or traffic accidents. Also, having the weather update allows me to know how to pack. One of the greatest things about satellite radio is the ability to find a particular interest and not have in interrupted by commercials or things you don't want to hear. Having the ability to tune into weather and traffic in a large city with constant, up to the minute updates is a great benefit to all. Please do not even consider remove this service. Remember, we are paying to subscribe to this service as well as the equipment to allow us the ability to be able to choose what we listen to on our radio. Don't take away the local programming on Satellite Radio!! Please. Thank you, Ms. Boyd
